

Meredith Flight Hangar

Des Moines, IA

Summary:

2000; Demolition of maintenance facility, relocation of security fence and utilities, entrance road modification, and construction of taxiway and 23,000 SF Butler building.

Special Features:

The bulk of the project consists of a 130' clear span pre-engineered metal building. It features a 90' x 27' hangar door and glazed curtain-wall. Attached to the main hangar building are two conventionally framed structures serving as a pilot's center and waiting room/entrance and a maintenance/mechanical area.
